As a global market leader, SIGOS offers quality assurance systems for mobile network operators and other leading mobile communication companies in over 150 countries worldwide.

SIGOS
testing is our competence

SIGOS is looking for a disciplined, self-motivated, organized, logical and analytical Technical Sales Test Automation Expert for our SIGOS App Experience (appexperience.sigos.com). The App Experience monitoring and test platform infrastructure is distributed across multiple data centers in North America, Europe, and Asia (and continues to grow).

Technical Sales Test Automation Expert

Fulltime | location: Nuremberg

Technical Sales Engineer is the primary technical resource on the App Experience sales team working closely with customer accounts. The Technical Sales Expert is dedicated to a sales territory working closely with Account Managers. The team works together to achieve or exceed mutual sales targets.

Your tasks:

- Presenting SIGOS App Experience solutions during customer meetings
- Recording, testing, and troubleshooting of customer tests scenarios
- Assisting the sales team in meeting and exceeding fiscal year revenue objectives by providing high-quality technical support
- Assisting during all phases of the solution sales cycle
- Working with customers and corporate resources such as technical support
- Product management to expedite resolution on escalated issues
- Maintaining open lines of communication with Product Management, Engineering, and Operations staff to effectively resolve bugs and service issues
- Travelling up to max 50% of the time, mostly in EU and sometimes to APAC, ME and Africa

Your profile:

- University degree in IT, Engineering or comparable branch of studies
- 4+ years of experience in developing, maintaining, and executing automated testing solutions in Quality Assurance/Development or Sales Engineering roles
- Extensive experience with mobile application software development and deployment
- Ability to analyse business and technical requirements and issues, and recommendation of software solutions
- Knowledge about developing automated test scripts using test automation tools and frameworks such as Appium, UFT etc.
- Expertise in developing automated scripts using programming and scripting languages such as Java, C/C++, Calabash, Python etc.
- Knowhow of integration tools such as Jenkins and visualization tools such as Splunk

You can expect…

… a diversified range of tasks and responsibilities in a dynamic and growing company
… interesting opportunities for further professional development
… an open and social organizational culture in an international atmosphere
